Data Mining and Data Warehousing

DS-510-MJ

Sample / Practice Question Paper

Semester I · Elective · Practice Paper

& This is a SAMPLE / PRACTICE question paper prepared for revision from the SPPU M.Sc. Data Science syllabus. It is NOT an official or past university examination paper. Use it only to test your preparation.

Time: 3 Hours

Maximum Marks: 35

Instructions: (1) All questions carry equal weightage where indicated. (2) Figures to the right indicate full marks. (3) Draw neat diagrams / write code wherever necessary.

Q1. Answer any FIVE of the following. [5 × 2 = 10]

- a) What is a data warehouse?
- b) Define OLAP.
- c) What is market basket analysis?
- d) State support and confidence.
- e) What is a decision tree?
- f) Differentiate classification and clustering.
- g) What is the K-Means algorithm?

Q2. Answer the following. [10]

A) Explain data warehouse architecture and OLAP operations.

OR

B) Explain the knowledge discovery process and data preprocessing.

Q3. Answer the following. [10]

A) Explain the Apriori algorithm for mining association rules with an example.

OR

B) Explain multilevel and multidimensional association rules.

Q4. Answer the following. [5]

A) Explain decision tree construction and attribute selection measures.

OR

B) Explain K-Means and Naïve Bayes classification.
